INTRODUCTION

WELCOME BACK TO HNU
In preparation for your return to campus this fall, we have prepared this document in consultation with guidance from Alameda County, the Centers for Disease Control, Johns Hopkins Public Health, and the American College Health Association to ensure we reopen and operate in the safest way possible. Our plan has been customized for our community’s needs and has been reviewed and approved by the Alameda County Health Officer. The standards in this guide will go into effect starting August 2020 and are subject to change pending public health guidance.

WHO IS GUIDING THE HNU RESPONSE TO COVID-19?
Campus convened a COVID-19 Response Team in March 2020 that has been meeting on a weekly basis and charged with monitoring local, state, and federal guidance and trends related to COVID-19. The team comprises the Chief of Staff, Executive Director of Raskob, VP for Student Affairs, VP for Facilities and Events, VP for Finance and Administration, Provost and VP for Academic Affairs, the Director of HR, our Head Athletic Trainer, and the Director of Marketing and Communications. It advises the President regarding institutional actions and communications that should be taken to address the COVID-19 pandemic. The Holy Names University COVID-19 Response Team has established this guide for the reopening of our campus.

WHAT WILL LIFE LOOK LIKE AT HNU IN FALL 2020?
Life will undoubtedly be different at HNU in fall 2020, but it will not detract from our commitment to offering a quality education. We will continue to be the HNU community that we have always been: tight-knit, looking after one another, and dedicated to the success of our students. We will often be working from a distance, but we will continue to deliver the true “HNU experience” that we are known to provide. We have been working diligently over the summer to establish new protocols, develop safety measures, and establish flexibility with our services in order to minimize the risk of transmission of COVID-19 on our campus.

We have implemented measures such as: flexible delivery of academic programs, daily self-screenings, temperature checks and visual screening of symptoms at the front gate, a contact tracing policy, facilitating physical distancing in all buildings, increased cleaning schedules, single-occupancy residence halls, and revised meeting/office policies to reduce the density on campus. Adhering to all these precautions will reduce the probability of COVID-19 transmission on our campus. An overview of these, and other changes related to student life, administrative processes, and campus visitation policies can be found throughout this reopening guide.
ACADEMICS

WHAT WILL THE ACADEMIC EXPERIENCE LOOK LIKE?
We have been hard at work this summer, following the guidelines of Alameda County, the state of California, and the CDC, to plan the safest and most “HNU” experience for our students when we reopen our campus. The COVID-19 pandemic is requiring us to be flexible, creative, and highly intentional about how we learn together. Below is information about what learning will look like at Holy Names University this fall semester.

Class Formats
The Office of Academic Affairs has selected two online class formats that students can expect this fall (see grid below). HNU pivoted to 100% online instruction out of concerns for the safety of our community. Formats for each individual class are available in the official Course Schedule.

<table>
<thead>
<tr>
<th>Synchronous Online Courses (real time)</th>
<th>Students work with faculty and peers only online during designated class times</th>
</tr>
</thead>
<tbody>
<tr>
<td>Asynchronous Online Courses (on your own time)</td>
<td>Students work with faculty and peers only online and access the course materials (e.g. lectures, assignments, and forums) on their own time.</td>
</tr>
</tbody>
</table>

Regardless of the mode in which classes are offered, students can expect faculty to continue to be available for consultation and feedback through office hours and other forms of communication. Students are expected to meet the course expectations and deadlines regardless of course format. Details will be provided via course syllabi and on Canvas as the start of the fall semester approaches.

Faculty will hold regular office hours to support students’ needs throughout the semester. In addition, the Cushing Library will be open on a truncated schedule. Please click here to access the library schedule: https://hnu.libcal.com/hours/

Academic Schedule
The Academic Schedule will follow the calendar as posted on the HNU website.
STUDENT LIFE

NEW HEALTH AND SAFETY PROCEDURES

Face Coverings

The State of California, and the Alameda County Health Officer have both issued ordinances that require face coverings to be worn at all times, including when you are outdoors and engaging in physical activities like walking, running, or biking within 30 feet of people. Face coverings include coverings of cloth, fabric, or other material that cover the nose, the mouth, and the lower face. Masks can be reusable if washed. **All individuals at HNU will be required to wear face coverings at all times in public in compliance with the state and county orders.**

Hygiene

The Centers for Disease Control have issued guidelines relating to safe hygienic practices that you will be required to follow at HNU including:

Washing and sanitizing your hands:

- Wash your hands often with soap and water for at least 20 seconds especially after you have been in a public place, or after blowing your nose, coughing, or sneezing. Campus bathrooms will be constantly monitored to ensure dispensers are adequately filled with soap throughout the day.
- If soap and water are not readily available, use a hand sanitizer that contains at least 60% alcohol. Cover all surfaces of your hands and rub them together until they feel dry. Hand sanitizing stations will be present in high-traffic areas on campus and constantly monitored to ensure they are adequately filled.
- Avoid touching your eyes, nose, and mouth with unwashed hands as you will increase the possibility of transmitting the COVID-19 virus to yourself with contaminated hands.

Physical Distancing

Members of the HNU community will be asked to follow physical distancing best practices at all times on campus, including in the residence halls:

- Stay at least six feet away from others at all times.
- Avoid job tasks that require close face-to-face work with others where possible.
- Avoid contact with others whenever possible (e.g., handshakes, hugs, etc.).
- Avoid touching surfaces that may have been touched by others where possible.
- Distance yourself from anyone who appears to be sick.
- Disinfect your workspace often, especially before and after use.
- Avoid touching your face.
- Avoid nonessential gatherings.

COVID-19 Screening

You should conduct a daily screening of yourself to determine if you are exhibiting any symptoms related to COVID-19 before going out in public. If you are commuting to campus, the front gate of HNU will require a temperature check, a visual screening of symptoms at the front gate, and for you to
attest that you are not exhibiting any symptoms or have encountered anyone who may have COVID-19 before allowing you to enter campus. The CDC considers a temperature of 100.4 F degrees or higher a fever.

You are required to conduct a daily screening of yourself to determine if you are exhibiting any symptoms related to COVID-19 before coming to HNU or leaving your residence hall room. An additional set of self-screening questions as defined by the Alameda County Public Health Official is below for you to use before coming to HNU or going out in public. Please notify the CARE Team via the online form to make us aware that you have contracted or suspect you may have COVID-19 if you answer yes to any of the following questions:

- **Within the last 10 days have you been diagnosed with COVID-19 or had a test confirming you have the virus?**
  - If yes, please do not come to campus or go out in public.

- **Do you live in the same household with, or have you had close contact (defined as living in the same house, being an intimate partner, being a caregiver, or being within six feet of an individual for longer than 15 minutes who has COVID-19) in the past 14 days with someone who has been in isolation for COVID-19 or had a test confirming they have the virus?**
  - If yes, please do not come to campus or go out in public.

- **Have you had any one or more of the below symptoms within the past 24 hours, which is new or not explained by a reason other than possibly having COVID-19?**

<table>
<thead>
<tr>
<th>Fever, Chills, or Repeated Shaking/Shivering</th>
<th>Shortness of Breath or Difficulty Breathing</th>
<th>Nausea and/or Vomiting</th>
</tr>
</thead>
<tbody>
<tr>
<td>Cough or Sore Throat</td>
<td>Feeling Unusually Weak or Fatigued, or Muscle Pain</td>
<td>Headache</td>
</tr>
<tr>
<td>Diarrhea</td>
<td>Loss of Taste or Smell</td>
<td>Runny or Congested Nose</td>
</tr>
</tbody>
</table>

  - If yes, please do not come to campus or go out in public.

**COVID-19 Testing**

You will be directed to get yourself tested with your health provider for COVID-19 should you exhibit symptoms of the virus or if you may have come in contact with someone who has tested positive for COVID-19, but you will not be required to get tested as a condition of returning to HNU in fall 2020. While some institutions are requiring all students to be tested for COVID-19, the CDC has stated:

*It is unknown if entry testing provides any additional reduction in person-to-person transmission of the virus beyond what would be expected with implementation of other infection preventive measures (e.g., social distancing, cloth face covering, hand washing, enhanced cleaning and disinfection). Therefore, the CDC isn’t recommending that colleges test all students, faculty, and staff as*
they return to campus, given that it's unclear whether entry testing actually reduces the virus's spread. Institutions that are planning a test-on-arrival approach, the CDC cautions, should be aware of the limited utility of testing people at a single point in time. And residential, isolated campuses might have less potential exposure to Covid-19 than do those with many commuter students or those whose students live in the local community.

Because HNU is considered an isolated campus, it will be critically important for you to closely monitor personal symptoms related to COVID-19 and follow strict physical distancing policies to help our community reduce the risk of virus transmission. If you suspect you may have COVID-19 or you have come into contact with someone who has contracted COVID-19, you will be directed to immediately self-isolate, consult a health professional, and get tested.

If you do not have a health provider, there are multiple testing sites that are available for you to receive a free test if you live on campus or live in Alameda County to determine if you have contracted COVID-19. Alameda County residents, including those who don’t have insurance, can find a local testing location and schedule a test at this link: Alameda County COVID-19 testing sites. You will not be asked immigration status and you are not required to give insurance information to get tested at one of the free testing sites. A directory of testing sites in other Bay Area counties can be found on the following link California COVID-19 testing sites.

A common list of questions and answers regarding testing for COVID-19 can be found at the following resource from Alameda County: COVID-19 Testing Questions and Answers.

**Symptoms of COVID-19**

People who have contracted COVID-19 have reported a wide range of symptoms according to the CDC – ranging from mild symptoms to severe illness. Symptoms may appear 2-14 days after exposure to the virus, and include but not limited to:

- Fever or chills
- Cough
- Shortness of breath or difficulty breathing
- Fatigue
- Muscle or body aches
- Headache
- New loss of taste or smell
- Sore throat
- Congestion or runny nose
- Nausea or vomiting
- Diarrhea

If you live in an HNU residence hall and experience any of the above symptoms, feel sick, experience flu-like symptoms, you are concerned that you may have COVID-19 or that you are have come into close contact with someone who has COVID-19, immediately self-quarantine yourself and contact call the RA on Duty at 510-318-2836.
If you do not live in a HNU residence hall, do not attempt to come to campus if you experience these symptoms and seek immediate medical attention. Please notify the CARE Team via the online form to make us aware that you have contracted or suspect you may have COVID-19.

**Shared Common Spaces**

It will be crucial for our campus to comply with strict social distancing guidelines in any indoor space according to the Alameda County Department of Public Health. It is because of this guidance that we discourage any group gathering in an enclosed area (e.g. meeting room, office, lounge, etc.).

If it is absolutely necessary, indoor gatherings will be limited to no more than 50% of the room’s original capacity or 10 people total (whichever capacity limit is smaller). Individuals must maintain six feet of physical distancing between each other at all times, and wear a face covering over the nose, mouth, and chin. You are also asked to NOT move any furniture in common areas as they have been carefully positioned to maintain at least six feet between sitting areas. You are encouraged to move your gatherings to outdoor spaces whenever possible to decrease the possibility of virus transmission.

**Quarantine, Isolation, and Return-to-Campus Procedures**

Isolation and quarantine are public health strategies that are employed to prevent exposure to individuals who have or may have a contagious disease such as COVID-19.

**Quarantine**: A practice that is used when a person has potentially been exposed to COVID-19 and needs to separate from other people in order to see if they develop symptoms and become sick. The quarantine period is usually up to two weeks (14 days) to determine if any COVID-19 symptoms develop for the individual. The guidance below is in accordance with the Alameda County Health Officer Quarantine Order and Quarantine Guidelines.

If you have been in close contact with someone who is infected with COVID-19, the Public Health Officer has indicated that you must quarantine for a 14-day period even if you test negative for COVID-19 during the quarantine period.

**Isolation**: A practice used when someone has symptoms or is confirmed to have COVID-19.

Students who test positive for COVID-19 or believe they have been infected will be instructed to follow the advice of a qualified medical professional and isolate. Students who are symptomatic or who have tested positive should not return to HNU until the conditions outlined in the table below are met and have been cleared by the Division of Student Affairs. The Alameda County Public Health Department’s instructions for release from isolation are summarized below:

<table>
<thead>
<tr>
<th>If you are sick and think/know you have COVID-19</th>
<th>If you tested positive for COVID-19 but never had any symptoms</th>
</tr>
</thead>
<tbody>
<tr>
<td>The student may exit isolation and return to HNU if:</td>
<td>The student may exit isolation and return to HNU if:</td>
</tr>
<tr>
<td>- They have stayed in isolation for 10 days and:</td>
<td>- They have stayed in isolation for 10 days</td>
</tr>
</tbody>
</table>

9
They have not had a fever for at least 72 hours, and have not used fever-reducing medication during that time, and

Coughs and other symptoms have improved

LIVING ON CAMPUS

We are preparing to safely welcome all students who need or want to live on campus this fall. To support physical distancing, the college is moving forward with a single-occupancy plan for fall, so each student will have her/his own sleeping room. This will not increase the room cost for students who have requested doubles. Students who have selected singles will be guaranteed single-occupancy rooms for spring as well, while students who selected doubles may be assigned a roommate when physical distancing restrictions are loosened.

- All residence halls and food service locations will operate under strict guidelines regarding enhanced cleaning, physical distancing, and other public health protocols to promote health and safety.
- Some units will be held in reserve to accommodate student residents who may need to be quarantined due to COVID–19.

HNU students within our residence halls are expected to follow all policies as outlined in the Student Code of Conduct and Residential Community Standards. In addition, to maintain the safety and well-being of all students and staff members living within the residence halls, residents are expected to adhere to all new COVID-19 policies in order to live on campus.

Residence Hall COVID-19 Policies

Limited Contact:
Following guidance from the government and the medical community regarding enhanced screening procedures and prevention measures, we have made some temporary adjustments that include limited contact at our student housing front desks / main desks to ensure a responsible and enjoyable environment for everyone.

Physical Barriers:
Physical barriers, such as plexiglass, have been added in select places where it is difficult to maintain strict physical distancing guidelines. These may be visible in areas around front desks, for example, to help ensure proper distances between people.
Masks:
Face Coverings: All residents and visitors are required to wear an appropriate face covering. Residents must always wear face coverings while outside of their assigned space, except when dining.

Guest Policy:
At this time, a “No Guest Policy” is in effect until further notice. HNU students who are not living on campus are also not allowed to access the residence halls at this time. Residents may direct requests for exceptions under unique circumstances to the Assistant Director of Housing and Residence Life. The No Guest Policy prohibits visitors within the residence halls who are not a current resident or HNU student. Residents may have no more than two people per room at any one time. Residents and approved guests both must wear masks and be able to maintain six feet of distance.

Physical Distancing:
Physical distancing will be in effect in all residence halls, including common areas, shared spaces in suites, bathrooms, laundry rooms, elevators and stairwells. As outlined by Alameda County, physical distance requires maintaining a distance of at least six feet from individuals who are not part of the same household or living unit.

Physical Distancing without Emotional Distancing:
Managing the number of residents within student housing has been a major consideration as we implement physical distancing guidelines based on recommendations from health authorities and government officials. One of the ways to do that is to limit the number of residents at any given time for each location, such as common areas. Additional measures include:

- Signage: Directional signage has been installed to assist residents to responsibly move throughout the residence halls. Additionally, ground markings will help promote proper physical distancing when is needed at a location, such as at dining courts.
- Training: We are also training staff members to engage with residents and promote physical distancing guidelines in common areas and queues.
- While we need to physically distance for the time-being, we are actively working on ways to stay connected and engaged to promote safety and well-being.

Resident Pledge
We can stop the spread. We can protect our first responders, our public health workers, our communities, our neighbors, our seniors, our families, ourselves. HNU encourages each member of our residence life community to take the following pledge:

- I pledge to regularly wash my hands.
- I pledge to not participate in large gatherings.
- I pledge to be cautious within my student housing building.
- I pledge to use a face covering when I leave my housing.
- I pledge to physically distance myself when I leave my housing.
- I pledge to physically distance but not emotionally distance.
- I pledge to isolate or quarantine myself if I have been exposed and/or begin to feel ill.
- I pledge to help stop the spread.

**Community Stabilization**
All residence halls will be thoroughly cleaned and sanitized prior to students’ arrival. HNU’s Facilities team has a plan in place to frequently clean high-touch surfaces in common areas, such as bathrooms and doorknobs in accordance with [CDC guidelines](https://www.cdc.gov).

**Dining Services and Cafeteria Policy**
HNU has revised its policies for indoor dining in compliance with guidelines from the Alameda County Department of Public Health. Below are fall 2020 policies and guidelines for the Public Market and other food services.

**Dining Services:**
The Public Market will be open for students, staff, and faculty. There will be one way to enter the Public Market and one way to exit. Epicurean staff will fill to-go containers and drinks will be prepared in advance. Until further notice from the Alameda Public Health Department, there will be no indoor dining in the Public Market. Reusable to-go containers will be available. At this time, Epicurean asks that they are returned quickly to ensure availability. They are in the process of creating a plan to pick up these containers every evening and return them to the Public Market.

Rosie’s Café will not be open during the fall of 2020, but Epicurean is working on a plan to offer some of Rosie’s Café food and drink options via a pre-order, pre-pay system.

Epicurean employees will all be COVID-19 ServSafe Certified and will follow their COVID-19 Safety Pledge. They will also perform the following functions every thirty minutes:

- Change cutting boards
- Sanitize stations
- Clean all counters and high traffic areas
- Sweep floor
- Change sanitizer buckets
- Change gloves
- Wash hands

Individuals who enter the Public Market will be required to abide by face covering and physical distancing protocols at all times.

**Vending Machines:**
Vending machines are in operation throughout campus. While they will be cleaned regularly, it is advisable to avoid coming in to contact with high touch items such as vending machines buttons unless absolutely necessary. You are encouraged to clean your hands after each use of a vending machine with soap and water or disinfect your hands using the hand sanitization stations located throughout campus.

**Hydration Stations:**
Refilling or hydration stations are located in Hester, the Library, Brennan, Heafey, and Residence Halls. All other drinking fountains have been locked for safety.
**Microwave Cooking:**
To reduce the number of shared surfaces on campus, microwave devices in public areas are not offered during this time.

**Refrigerators:**
To reduce the number of shared surfaces on campus, refrigerators in public areas are not offered during this time.

**Public Kitchen Areas/Breakrooms:**
Physical distancing is required in all shared spaces. No use of reusable utensils, dishware, etc., is allowed. Microwaves and refrigerators will not be provided.

**Community Response**
- **Possible Exposure to COVID-19**
  - If you may have been possibly exposed to COVID-19 as a result of being in contact with an individual who has tested positive, please contact your Medical Provider and notify the RA on Duty. If you are confirmed to have been exposed to COVID-19, you will be moved to Isolation/Quarantine (see below for “tested positive”).
- **Feeling Ill**
  - If you are feeling ill and unsure if it is related to COVID or common illnesses such as colds or flu; we ask that you stay within your assigned space and contact your medical provider.
- **Tested Positive**
  - Residents will Isolate within assigned space, notify the Director of Residence Life, prepare to move to Isolated Quarantine location (single with bath).
  - Work with Housing and Residence Life staff in regards to obtaining food, disposing of trash, and addressing basic necessities.
  - Work with Academic Affairs regarding classes.

**Community Resources**
- [https://www.virusanxiety.com/](https://www.virusanxiety.com/)
  - Toolkit/ Resources for anxiety and mental health in a global climate of uncertainty
- [https://healthblog.uofmhealth.org/wellness-prevention/5-ways-to-manage-your-mental-health-during-covid-19](https://healthblog.uofmhealth.org/wellness-prevention/5-ways-to-manage-your-mental-health-during-covid-19)

**Financial Concerns**
Students whose financial circumstances have been affected by the pandemic may email the Financial Aid office at [financialaid@hnu.edu](mailto:financialaid@hnu.edu) or schedule a phone appointment with a financial aid counselor at 510-436-1327 to learn about resources that may be available.
CAMPUS ACTIVITIES

HNU will continue to provide campus activities and programming where students can connect with peers and engage in community.

We will provide ongoing virtual programming for the entire community as well as hybrid (online and in-person) opportunities for students who are on campus.

In-person activities will be in outdoor spaces whenever possible to decrease the possibility of virus transmission.

- Capacity for in-person events will be limited in order to allow everyone to keep their distance.
- Individuals must maintain six feet of physical distancing between each other at all times, and wear a face covering over the nose, mouth, and chin.

HNU ATHLETICS

The PacWest Conference has postponed all Fall competition. We expect a decision on the start of the 2020-21 winter sports season, as well as the non-championship segments of spring sports by October 1. Once we receive clearance from Alameda County, HNU athletes can work out individually or in small groups provided they follow current health and safety protocols including physical distancing. Athletes and coaches can expect further announcements from the Director of Athletics regarding NCAA Guidelines.

A summary of selected Athletics policies that will be enforced this academic year is below:

Athletic Training Room (ATR)

- Athletes will only be allowed inside the ATR if they have an appointment.
- One person at a time on the taping table or the taping station outside before competition.
- No loitering in ATR if they are not there for an appointment or rehab.
- ATR athlete occupancy limit will be between 6-8 individuals.
- Use proper entrance door and exit door when appropriate.

Temperature Checks and Hygiene

Athletes will be required to undergo temperature checks and COVID-19 symptom screening. No appointment is needed for temperature checks and COVID-19 symptom screening, which will be conducted in the grass area approximately one hour before practice. Athletes will also be required to:

- Wear a facemask at all times.
- Disinfect any table that they use.
- Wash hands upon entering the ATR.
- Bring their own water bottle to all practices and competitions.
- Athletes will no longer be able to self-serve from the ice machine.
**Van Protocol**

If you are an athlete who needs to ride in an HNU van, you will be required to wear a face covering at all times in the van. Wearing a cloth face covering will be critical to minimizing potential transmission of COVID-19. All windows of the van will also be required to be open for the duration of transportation to maintain constant airflow. An extra set of clothing will be required to change into after practice is over so vans stay as clean as possible.

Eight people maximum will be allowed per van *only if six feet of distance can be kept between each individual* in the vehicle, otherwise the capacity will be less than 8.
FACULTY AND STAFF

NEW HEALTH AND SAFETY PROCEDURES

Face Coverings
The State of California, and the Alameda County Health Officer have both issued ordinances that require face coverings to be worn at all times, including when you are outdoors and engaging in physical activities like walking, running, or biking within 30 feet of people. Face coverings include coverings of cloth, fabric, or other material that cover the nose, the mouth, and the lower face. Masks can be reusable if washed. All individuals at HNU will be required to wear face coverings at all times in public to be in compliance with the state and county orders.

Hygiene
The Centers for Disease Control have issued guidelines relating to safe hygienic practices that you will be required to follow at HNU including:

- Wash your hands often with soap and water for at least 20 seconds especially after you have been in a public place, or after blowing your nose, coughing, or sneezing. Campus bathrooms will be constantly monitored to ensure dispensers are adequately filled with soap throughout the day.
- If soap and water are not readily available, use a hand sanitizer that contains at least 60% alcohol. Cover all surfaces of your hands and rub them together until they feel dry. Hand sanitization stations will be present in high-traffic areas on campus and constantly monitored to ensure they are adequately filled.
- Avoid touching your eyes, nose, and mouth with unwashed hands as you will increase the possibility of transmitting the COVID-19 virus to yourself with contaminated hands.

Physical Distancing
Practice physical distance at all times while at HNU to reduce the possibility of transmitting COVID-19. These practices include:

- Always stay at least six feet (about two arms’ length) from other people including in classrooms, dining facilities, and in transit walking across campus.
- Remember that some people without symptoms may be able to spread virus, and you may catch the virus from someone who is not exhibiting symptoms.
- Keeping at least six feet of space between you and others is one of the best strategies we have to avoid being exposed to COVID-19 and slow its spread.

COVID-19 Screening
You are required to conduct a daily screening of yourself to determine if you are exhibiting any symptoms related to COVID-19. A set of self-screening questions as defined by the Alameda County Public Health Official is below for you to use before coming to HNU or going out in public. You should
alert your supervisor and not come to Holy Names University if you answer yes to any of the following questions:

- **Within the last 10 days have you been diagnosed with COVID-19 or had a test confirming you have the virus?**
  - If yes, please do not come to campus or go out in public.

- **Do you live in the same household with, or have you had close contact (defined as living in the same house, being an intimate partner, being a caregiver, or being within six feet of an individual for longer than 15 minutes who has COVID-19) in the past 14 days with someone who has been in isolation for COVID-19 or had a test confirming they have the virus?**
  - If yes, please do not come to campus or go out in public.

- **Have you had any one or more of the below symptoms within the past 24 hours, which is new or not explained by a reason other than possibly having COVID-19?**

  | Fever, Chills, or Repeated Shaking/Shivering | Shortness of Breath or Difficulty Breathing | Nausea and/or Vomiting |
  | Cough or Sore Throat | Feeling Unusually Weak or Fatigued, or Muscle Pain | Headache |
  | Diarrhea | Loss of Taste or Smell | Runny or Congested Nose |

  - If yes, please do not come to campus or go out in public.

The front gate of HNU will require a temperature check to confirm you do not have a fever, a visual screening for symptoms of COVID-19, and for you to attest that you are not exhibiting any symptoms or have encountered anyone who may have COVID-19 before allowing you to enter campus. The CDC considers a temperature of **100.4 F degrees or higher** a fever. Please contact your area VP if you are denied entry at the front gate for exhibiting any symptoms defined by the Alameda County Health Department.

**COVID-19 Testing**
You will be directed to get yourself immediately tested with your health provider for COVID-19 should you exhibit symptoms of the virus or if you may have been exposed to someone who has tested positive for COVID-19 during the academic year.

You will not be required to get tested as an initial condition of returning to HNU in fall 2020. While some institutions are requiring all faculty and staff to be tested for COVID-19 as an initial condition of returning this fall 2020, the [CDC](https://www.cdc.gov) has stated:
It is unknown if entry testing provides any additional reduction in person-to-person transmission of the virus beyond what would be expected with implementation of other infection preventive measures (e.g., social distancing, cloth face covering, hand washing, enhanced cleaning and disinfection). Therefore, the CDC isn't recommending that colleges test all students, faculty, and staff as they return to campus, given that it's unclear whether entry testing actually reduces the virus's spread. Institutions that are planning a test-on-arrival approach, the CDC cautions, should be aware of the limited utility of testing people at a single point in time. And residential, isolated campuses might have less potential exposure to Covid-19 than do those with many commuter students or those whose students live in the local community.

Because HNU is considered an isolated campus, it will be critically important for you to closely monitor personal symptoms related to COVID-19 and follow strict physical distancing policies to help our community reduce the risk of virus transmission. If you suspect you may have COVID-19 or you have come into contact with someone who has contracted COVID-19, you will be directed to immediately self-isolate, consult a health professional, and get tested.

If you do not have a health provider, there are multiple testing sites that are available for you to receive a free test if you live in Alameda County to determine if you have contracted COVID-19. Alameda County residents, including those who don’t have insurance, can find a local testing location and schedule a test at this link: Alameda County COVID-19 testing sites. You will not be asked immigration status and you are not required to give insurance information to get tested at one of the free testing sites. A directory of testing sites in other Bay Area counties can be found on the following link California COVID-19 testing sites.

A common list of questions and answers regarding testing for COVID-19 can be found at the following resource from Alameda County: COVID-19 Testing Questions and Answers.

**Contact Tracing**

Contact Tracing is an effective disease control strategy that involves investigating cases and their contacts and then interrupting disease transmission—typically by asking cases to isolate and contacts to quarantine at home. Contact tracing is a key strategy to prevent the further spread of COVID-19, and you can play a critical role in minimizing the spread of COVID-19 at HNU. Your area Vice President will present to you an online template for you to complete upon your return to campus. You will be required to turn in your template to your area vice president at the conclusion of each week.

In lieu of technology that is able to effectively conduct contact tracing at HNU, we are asking you to manually record your interactions through the online template with anyone who falls into any of the categories below as a means to control the possibility of an outbreak on campus:

A. Interactions with anyone the CDC defines as "close contact” (i.e. an interaction with someone who was within six feet of you for more than 15 minutes)
B. Interactions with single or multiple individuals that took place in a confined space (e.g. indoor meetings, hallway conversations, etc.)
C. Interactions with anyone who was not wearing appropriate face covering (i.e. protective cloth masks that cover both the nose and chin)
D. Interactions with anyone who exhibits symptoms of COVID-19 (e.g. fever/chills, cough, difficulty breathing, fatigue, aches, headaches, loss of taste/smell, nausea, vomiting, sore throat, congestion/runny nose, diarrhea, etc.)

**Symptoms of COVID-19**
People who have contracted COVID-19 have reported a wide range of symptoms according to the CDC – ranging from mild symptoms to severe illness. Symptoms may appear **2-14 days after exposure to the virus, and include but are not limited to:**

- Fever or chills
- Cough
- Shortness of breath or difficulty breathing
- Fatigue
- Muscle or body aches
- Headache
- New loss of taste or smell
- Sore throat
- Congestion or runny nose
- Nausea or vomiting
- Diarrhea

Do not attempt to come to campus if you experience any of these symptoms and seek immediate medical attention. Please contact your area Vice President to make them aware that you are experiencing symptoms related to COVID-19:

**Quarantine and Isolation Procedures**
Isolation and quarantine are public health strategies that are employed to prevent exposure to individuals who have or may have a contagious disease such as COVID-19.

**Quarantine:** A practice that is used when a person has potentially been exposed to COVID-19 and needs to separate from other people in order to see if they develop symptoms and become sick. The quarantine period is usually up to two weeks (14 days) to determine if any COVID-19 symptoms develop for the individual. The guidance below is in accordance with the Alameda County Health Officer Quarantine Order and Quarantine Guidelines.

If you have been in close contact with someone who is infected with COVID-19, the Public Health Officer has indicated that you must quarantine for a 14-day period even if you test negative for COVID-19 during the quarantine period.

**Isolation:** A practice used when someone has symptoms or is confirmed to have COVID-19.
Faculty and staff who test positive for COVID-19 or believe they have been infected will be instructed to follow the advice of a qualified medical professional and isolate. Faculty or staff who are symptomatic or who have tested positive should not return to HNU until the conditions outlined in the table below are met and have been cleared by their area vice president. The Alameda County Public Health Department’s instructions for release from isolation are summarized below:

<table>
<thead>
<tr>
<th>If you are sick and think/know you have COVID-19</th>
<th>If you tested positive for COVID-19 but never had any symptoms</th>
</tr>
</thead>

GROUP MEETING AND GATHERING POLICY

Common Spaces
It will be crucial for HNU to comply with strict physical distancing guidelines in any indoor space according to the Alameda County Department of Public Health. It is because of this guidance that we discourage group gatherings in enclosed common areas (e.g. lounges, foyers, etc.) on campus if possible. Group gatherings include: hallway discussions, indoor meetings, activities, etc.

Indoor common space gatherings (such as classrooms) will be limited to no more than 50% of the room’s original capacity while also meeting physical distance needs of maintaining at least six feet of physical distancing between individuals and wearing a face covering over the nose, mouth, and chin at all times. You are also asked to NOT move any furniture in common areas. You will also be required to record whom you shared a common space within your contact log (see contact tracing section) if you hold any type of indoor gathering and sanitize your hands before and after the gathering.

You are encouraged to move your gatherings to outdoor spaces whenever possible while maintaining physical distance practices to decrease the possibility of virus transmission.

Meetings
In-person meetings at HNU should be reconsidered and conducted via Zoom whenever possible. We also understand that a defining characteristic of the HNU culture is built on in-person interactions, and we will ask that you follow practices below when you do decide to hold in-person meetings to decrease community risk and prevent the spread of COVID-19 as detailed by the CDC:
• Wear a face covering at all times during the meeting.
• Keep at least six feet away from others at all times.
• Limit the capacity to no more than 50% of the room’s original capacity.
• Avoid personal contact with meeting participants (i.e. Don’t shake hands, hug, etc.).
• Open windows when available to ensure proper ventilation in enclosed spaces.
• Wash hands often with soap and water for 20 seconds and/or use hand sanitizer before and after each meeting.
• Don't touch your face, nose, or mouth, especially with unwashed hands.
• Don't share water bottles, napkins, utensils, or have food at your meeting.
• Don’t share office supplies (i.e. pens, paper, folders, etc.) and use electronic files instead of paper whenever possible.
• Frequently clean touched surfaces with household disinfectant. Leave slightly wet and allow to air dry for best disinfection.

IN-PERSON OFFICE POLICY

We encourage all individuals to work with their supervisor and area Vice President to develop a flexible plan for office coverage for the fall 2020 semester. Certain offices may need to return in person to effectively deliver their services, while others may be able to develop a rotating schedule of in-person office coverage that permits a blend of in-person and online delivery. Offices with shared work areas should limit the duration multiple staff are in close proximity to one another for extended periods of time. Hard plastic barriers will also be installed at workstations where individuals experience high traffic of visitors as an added measure of protection. Supervisors are encouraged to consider a rotation of office coverage with staff if such a schedule decreases the density of individuals in a specific workplace at a particular time.

Plans for departmental coverage as well as how students will receive services for each office should be posted both physically at the office site and made available online for students to easily find. All departmental offices are still required to effectively deliver their services (either online, in person, or both) to students who request them during normal business hours. You are encouraged to speak with your direct supervisor and area Vice President if you have any questions regarding office coverage.

Finally, while the strategies highlighted in this document are being implemented to help decrease the risk for transmission of COVID-19, it is important to follow CDC guidance at all times to further protect yourself as best as possible. More information and guidance from the CDC can be found here.
CAMPUS VISITOR POLICY

External visitors (i.e. individuals without an HNU identification card) will need prior approval to be allowed on campus until further notice in the interest of minimizing the risk of potential external transmission of COVID-19 on campus. Contractors, vendors, or drivers delivering goods and services to the campus will be permitted with prior approval and clearance from Campus Safety. All persons coming on campus will be required to provide photo identification.

HNU has made the decision to cancel or postpone large gatherings and off-campus affiliated events (e.g. speakers, conferences, programs, etc.) at least through fall 2020. The purpose of this decision is to reduce the possibility of further transmitting COVID-19 into or out of the HNU community.

These protocols are intended to mitigate the spread of COVID-19 and are subject to change with the introduction of additional public health guidelines from local, state and federal authorities.

External Visitor Requests

Campus visitors (e.g. prospective students and families who have arranged for a campus tour) will be permitted only when they have a pre-approved appointment that has been cleared through Campus Safety and HNU’s visitor management system, Envoy. Information about how to register with the Envoy is available online. All external visitors to HNU will be asked to provide an official form of personal identification (e.g. driver’s license, passport, etc.) that includes their photo and full name upon arrival at the front gate.

Requests should be sent to CampusSafety@hnu.edu at least 24 hours prior to the visit. They should include the nature of the visit and the specific department who will sponsor the visitor(s) while they are on campus. These requests will be reviewed and confirmed by the Office of Campus Safety and the Office of Campus Services. Urgent requests may be communicated by phone to the Front Gate personnel non-emergency line at 510-436-1600 but are not guaranteed to be accommodated.

All visitors will be required to self-screen for symptoms as defined by the Alameda County Public Health Official before arriving at HNU to minimize the risk of transmission on campus. The Envoy COVID-19 contact tracing app, which can be downloaded to both Android and Apple devices, will instruct visitors to attest to the self-screening process directly through the app. Visitors may not enter the HNU campus if they are ill, experiencing a cough, shortness of breath, fever, or answer yes to any of the questions below.

- Within the last 10 days have you been diagnosed with COVID-19 or had a test confirming you have the virus?
  - If yes, please do not come to campus or go out in public.

- Do you live in the same household with, or have you had close contact (defined as living in the same house, being an intimate partner, being a caregiver, or being within six feet of an individual for longer than 15 minutes who has COVID-19) in the past 14 days with someone who has been in isolation for COVID-19 or had a test confirming they have the virus?
  - If yes, please do not come to campus or go out in public.
• Have you had any one or more of the below symptoms within the past 24 hours, which is new or not explained by a reason other than possibly having COVID-19?

<table>
<thead>
<tr>
<th>Fever, Chills, or Repeated Shaking/Shivering</th>
<th>Shortness of Breath, Difficulty Breathing</th>
<th>Nausea and vomiting</th>
</tr>
</thead>
<tbody>
<tr>
<td>Cough, Sore Throat</td>
<td>Feeling Unusually Weak or Fatigued, or Muscle Pain</td>
<td>Headache</td>
</tr>
<tr>
<td>Diarrhea</td>
<td>Loss of Taste or Smell</td>
<td>Runny or congested nose</td>
</tr>
</tbody>
</table>

If yes, please do not come to campus or go out in public.

All persons entering the campus through the single point-of-entry at the HNU front gate will be subject to temperature checks and will be visually screened for any symptoms of COVID-19 exposure. Any person who registers a temperature exceeding **100.4 F** is determined to have a fever as defined by guidelines from the CDC and will not be permitted to enter the campus. An additional temperature check on a different thermometer may be requested. The office sponsoring the visitor will be notified if access is not granted to the individual(s) due to exhibiting the symptoms identified in the above chart.

All visitors are required to bring and wear their own face covering for the duration of their visit. Visitors will not be permitted past the front gate without wearing a cloth face covering. Physical distancing guidelines are in effect for the entire University and Campus Safety will enforce these measures for all individuals who enter the campus. Any person who knowingly violates any of the requirements of the face covering or physical distancing policy will be asked to leave the campus by Campus Safety personnel.
COMMON QUESTIONS AND ANSWERS

Are there protocols to require COVID testing for anyone who has demonstrated symptoms?
All individuals will be required to conduct a self-assessment of their health every day before they come to HNU. Anyone who believes they are exhibiting symptoms will be required to get tested through a health care provider or a community testing site to confirm they do not have COVID-19 before being allowed on campus.

If someone feels sick but tests negative, what is the follow-up protocol for campus return?
You are required to stay away from campus if you feel sick or exhibit any symptoms of COVID-19, regardless of your test result. Please do not return to campus until you are completely recovered from feeling ill. If you have come in close contact with someone who has COVID-19, you must quarantine for a full 14-day period even if you test negative for transmission. If you have any doubt of your well-being, you are asked to stay home.

What is the threshold for closure at HNU?
The COVID-19 Response Team will consult with the Alameda County Department for Public Health regarding the threshold for physically closing campus if an outbreak is suspected at HNU. The institution currently has isolation and quarantine rooms for campus residents, and all community members can play their part to ensure an outbreak or closure does not occur by wearing a cloth face covering at all times, maintaining physical distance, and exercising good hygiene.

Will I have to wear a face covering at all times even if I don’t feel sick?
Yes. Face coverings are mandatory at all times (even when you’re outside) while in the presence of others on the HNU campus. It is important to note that someone does not have to exhibit symptoms in order to be a carrier for COVID-19 (i.e. they may be asymptomatic). The best way to mitigate against the risk of transmission is to wear a face covering at all times and maintain a safe physical distance of at least six feet from others in all settings.

What if I encounter someone not wearing a face covering on the HNU campus?
You should avoid approaching anyone not wearing a face covering for the purpose of attempting to enforce any face-covering requirement. In these instances, you should maintain at least a 6-foot distance from others and raise any concerns to Campus Safety at campussafety@hnu.edu or 510-436-1234 who will forward concerns to the appropriate department.

There may be limited circumstances where HNU will need to engage in a process with individuals who claim a disability-related reason for not being able to wear a mask to see if there are accommodations that are effective in maintaining the safety of the campus.

For supervisors needing to address an employee, consider using the following language:
- “Following the guidelines (on face coverings or distancing) can protect you and everyone else, so we ask that you follow them.”
- “If you don’t have a face covering, we’d be happy to provide one (if available).”
In all instances, it is important for supervisors to focus on minimizing risk and to practice de-escalation measures:
- Speak with a calm voice at a normal volume and communicate with posture and expression that the person will be respected.
- Settle on a method for calling in support from security or law enforcement if needed.

**What is the plan for the spring 2021 semester?**
The current nature of the pandemic is evolving quickly and plans for spring 2021 will be released as HNU receives guidance from public health officials to inform campus of best practices. The latest updates to HNU’s plans can be found on the institution’s COVID-19 information page: hnu.edu/coronavirus

**Is there a different reopening policy for Raskob?**
Yes, the Raskob Day School has established its own set of policies unique to their campus for fall 2020 and information about their plans is available through the Executive Director of Raskob.

**Does your revised visitor policy allow for Uber/Lyft rideshare and food delivery services?**
All rideshare and delivery services are temporarily not permitted past the front gate. Individuals may pick up rides and food deliveries outside of the front gate but will be subject to temperature and visual screening before being permitted back on to campus.
**CAMPUS REOPENING RESOURCES**
